Our most powerful fleet vehicle tracking device

Geotab's most powerful vehicle tracking device ever: the GO9 and GO9+. We redesigned our GO platform from the ground up, equipping it with a 32-bit processor, more RAM and a gyroscope. The GO9 also features an expanded capacity to support improved fuel usage, electric vehicles and global fleet expansion.

Advanced GO9 model options

Along with our standard GO9 device, we offer two additional GO9 models: the GO9 RUGGED and GO9+.

GO9+: Advanced vehicle tracking featuring on-board Wi-Fi hotspot

Get all the advanced vehicle tracking features of GO9 and a Wi-Fi hotspot with GO9+. Stay connected to high-speed internet that doesn't drain your data. The compact GO9+ provides everything you need for your office on wheels to improve efficiency, decrease costs and stay productive and safe. The GO9+ is ideal for ridesharing, small businesses, heavy-truck fleets and corporate vehicles. See product features ↗ .

Simple vehicle tracking device installation

Geotab GO9 is a compact vehicle tracking device that plugs directly into your vehicle's onboard diagnostics (OBD) II port. No additional antennas or wire-splicing is necessary. The GO9 installation process is quick, easy and doesn't require special tools.

Learn more about OBD II

Industry-leading secure communication

We work with industry associations, universities, and authorities to advance cybersecurity in the telematics industry. We incorporate the best of what they learn and validate their implementation through rigorous third-party penetration testing. We then share these proven best practices throughout our industry. Device security features are implemented using a FIPS 140-2 validated cryptographic module. Certificate #3371

- End-to-end security using authentication
- Encryption
- Message integrity verification
- Individualized devices with unique ID
- Non-static security keys
- Digitally-signed firmware
- Independent third-party expert validation

Geotab GO Resources

Vehicle tracking helps you control fleet efficiency, costs, safety and compliance via a vehicle tracking device. Expand your knowledge of fleet vehicle tracking devices and systems, as well as how real-time tracking works.

Keep your business moving forward

Our device failure rate is less than 1% — far below the industry average — so you can keep getting the insights that help create efficiency. Get rich, accurate data on location, vehicle health, driving behavior and much more in near real-time.

IOX expansion: powerful Add-Ons to future-proof your fleet

The Geotab online fleet management platform can be extended even further, at any time, to provide added flexibility and integration with third-party providers. Choose any Add-Ons that suit your needs, such as satellite tracking, driver ID, hours of service (HOS), temperature tracking, camera systems, and more.
